Plagiarism destroys your career life. Long time ago, students cannot seem to know if the paper they submitted contained plagiarized content. All they knew was that they were already facing the crime of plagiarism. Sadly, they do not have access to free plagiarism checker like Plagiarisma. Today, scholars are able to correct and edit similar idioms after scanning their documents with anti-plagiarism software. Teachers also will find the tool lessening the burden of returning research works and filing cases against students for plagiarism. Introducing the originality checker considered as an important tool for schools, colleges, academies, institutions and universities. It works on Windows, Android, BlackBerry, Moodle and Web. It detects copyright infringement in your essays, research paper, coursework or dissertation. It supports Google, Yahoo, Bing, Scholar and Books. It helps avoid plagerism. It will only take a few minutes to check your document. Are you searching for plagarism detector that is accurate enough to help you track duplicate content? Make things a bit easy on you. Use accurate plagiarism checker to track all your written content. Save yourself from embarrassment of being accused from accidental plagiarism. Although the paid features of Plagiarisma are better and allow you to customized, using the free subscription for purely duplicate content scanning is good enough for you. You should be aware that the result of the scan is not a matter of testing your honesty. It is a practical program designed to help you track down similar sentences. <http://journals.ums.ac.id/index.php/jiti/index> doi: 10.23917/jiti.v16i2.3234 100 Analisis Penerimaan Mahasiswa Baru Dengan Penentuan Strategi Keunggulan Bersaing Shafiq Nurdin 1\* , Riski Nur Istiqomah Dinnullah 2# Abstract. The strategy will determine the competitive advantage of the organization, including the college. The right strategy in the admission of new students needs to be formulated. Faculty of Engineering Universitas Merdeka Malang need to formulate strategy in acceptance of new student. The data used is taken in 2015. The data collected is then analyzed using Value Chain analysis. Five attributes of competitive advantage are majors, physical facilities, tuition fees, location, and promotion. The strategy is consolidation that is defensive, avoiding market loss by strengthening the loyalist network, horizontal integration with more effort to expand the market that has not been absorbed maximally, to penetrate the market and develop the department. The appropriate strategy developed in increasing the competitive advantage of Unmer Faculty of Engineering Malang is a focus strategy. This focus strategy is directed to differentiation, where the Faculty of Engineering seeks to achieve differentiation within its target segment. Keywords: excellence competitive strategy, new student, value chain analysis Abstrak: Strategi akan menentukan keunggulan bersaing organisasi. Strategi yang tepat dalam penerimaan mahasiswa baru juga perlu dirumuskan. Fakultas Teknik Universitas Merdeka Malang perlu merumuskan strategi dalam penerimaan mahasiswa baru. Data yang digunakan diambil pada tahun 2015. Data yang dikumpulkan kemudian dianalisis dengan menggunakan analisis Rantai Nilai. Lima atribut keunggulan bersaing, adalah: jurusan, sarana fisik, biaya pendidikan, lokasi, dan promosi. Strategi yang dilakukan adalah konsolidasi yang bersifat defensif yaitu

Disetujui : 19 Nopember 2017. Dipublikasikan : 4 Desember 2017 ©2017 –TESJ Fakultas Teknik Universitas Maarif Hasyim Latif. Ini adalah artikel dengan akses terbuka di bawah lisensi CC BY 4.0 (<https://creativecommons.org/licenses/by/4.0/>) ABSTRAK Pengoperasian pintu air pada aliran sungai saat ini masih menggunakan sistem manual dengan menggunakan campur tangan tenaga manusia untuk pengendali buka tutupnya. Hal ini mendorong peneliti untuk melakukan penelitian dengan sistem kendali berbasis smartphone berbasis android. Dalam penelitian ini penulis menggunakan smartphone android sebagai sarana untuk kendali pintu air. Smartphone dipilih oleh penulis karena saat ini menjadi alat komunikasi sehari-hari yang mobile di semua kalangan masyarakat sedangkan android merupakan sistem operasi yang sebagian besar dipakai pada smartphone tersebut. Smartphone berbasis android akan secara langsung mengendalikan buka tutup pintu Daerah Aliran Sungai (DAS) dengan menggunakan program aplikasi. Masukan dari aplikasi akan memberikan informasi perintah yang diberikan, selanjutnya akan diterima oleh sistem kendali yang terhubung pada mekanisme gerakan mekanik pintu air sungai. Peralatan kendali menggunakan perangkat Arduino Uno yang mampu mengubah signal digital menjadi gerakan mekanik dalam mengoperasikan pintu DAS. Hasil penelitian yang diperoleh, penggunaan perangkat kendali Arduino Uno tidak menyed
