PREFACE

The 2016 International Conference on Education and Social Science (UK-ICESS) is the first international conference hosted by Universitas Kanjuruhan Malang as a part of its XLI Dies Natalis commemoration. This international conference invites all educators and researchers in the field of education and social sciences to share latest issues, research, and information in these areas. Thus, as an important part of this academic forum, the organizing committee is pleased to present the Proceeding of 2016 International Conference on Education and Social Sciences which brings up the main theme of *Educational and Social Issues in the Changing Asia*.

There are 65 papers in this compilation, covering various topics around the theme of educational and social issues in the changing Asia which were studied from vast research areas; such as economics, health, education, language, arts, technology, geography, civics, and entrepreneurship. It is expected that all papers in this proceeding will enrich our knowledge and broaden our insights of current issues, trends, research, and information in the areas of education and social sciences.

Lastly, the organizing committee would like to deliver great appreciation to writers, presenters, and all parties who have been contributing to the publication of this proceeding.

Malang, November 2016

The Committee

TABLE OF CONTENT

Preface	iii
Table of Content	iv

Conference Papers

1. The Application of Cooperative Learning Model (Tutor and Tutee) in the Playing Outdoor Activities for Early Childhood <i>Achmadi; Aisyah</i>	1
2. Parenting Parents in Developing Character Education in Early Childhood <i>Aisyah; Isabella Hasiana</i>	8
3. Looking beyond Teacher's Classroom Management: EFL Teachers' Pedagogical Knowledge from Different Backgrounds in Teaching Autistic Students in Different Settings <i>Alam Aji Putera, M. Adnan Latief, Ali Saukah, Sri Rachmajanti</i>	15
4. Student Activities in Learning NCTM Standards with Cognitive Load Theory Concept of Rank in Grade X Vocational High School <i>Arika Indah Kristiana, Suharto</i>	25
5. Effect of Betel Leaves Decoctionin to Speeding Perineum Healing for Postpartum Women in BPM Endang Sutikno Kediri <i>Candra Wahyuni</i>	30
6. The Importance of Entrepreneurship Education for Farmer <i>Darmadji</i>	36
7. Is Internal Corporate Social Responsibility Related to Employee Engagement? <i>Dianawati Suryaningtyas</i>	46
8. Implementation of Entrepreneurial Learning Model Based on Local Wisdom through Mind Mapping Method to Achieve the Effectiveness of Learning <i>Endah Andayani; Lilik Sri Hariani; Suko Winarsih; Rusno</i>	54
9. Entrepreneurship Learning Model Involving the Businessman (Entrepreneur in Residence); Implementation of Social Entrepreneurship at Ciputra University <i>Wina Christina, Herry Purwoko, Astrid Kusumowidagdo</i>	64
10. The Implementation of Social Science Inquiry Learning Strategy in Civics Education <i>Hernawaty Damanik, I Nyoman S Degeng, Punaji Setyosari, I Wayan Dasna.</i>	71

11. Flores Local Genius on Move (Integrating both Character Education and Manggaraian Local Genius in Teaching English Speaking) <i>Hieronimus Canggung Darong</i>	78
12. The Effectiveness of <i>Jengah</i> Conception to Control the Students' Communication Anxiety in Mathematics Learning <i>I Made Ardana</i>	88
13. The Impact of Blended Learning towards Teaching Learning Process and Student's Maturity <i>R. Jacobus Darmanto; Agustinus Fahik</i>	95
14. The Use of Google Slides to Build Students' Collaborative Work in Reading Comprehension Skill to Master the Report Texts <i>Jastman</i>	103
15. Good Behaviour Game to Reduce Aggressive Behaviours on Children <i>Gracia Sudargo, Laura Makaria Sudargo</i>	113
16. The Implementation of Curriculum 2013 on Economics by Using Scientific Approach in SMAN Malang <i>Lilik Sri Hariani; Endah Andayani</i>	122
17. Students' Perception of Interactive Multimedia Mediated Web-based Learning <i>Mclean HY, Isnawati</i>	128
18. Building Student's Character through Indirect Teaching in Indonesian High Schools <i>Mirjam Anugerahwati</i>	138
19. The Relationship between Gender, Age, and Attitude toward Mathematics among Malaysian Gifted Students <i>Mohd Fadzil bin Kamarudin; Mohd Hasrul bin Kamarulzaman; Noriah Mohd Ishak</i>	143
20. The Development of Learning Model for Accounting Education Based On Islamic Ethics in Higher Institutions <i>Muslichah, Evi Maria</i>	154
21. Integrating Sustainability Education into Higher Institutions <i>Muslichah; Shabrina Ramadania</i>	167
22. Perceptions of Novice English Teachers on Student-Centre Approach in Teaching English <i>Neni Nurkhamidah; Sinta Dewi Yulianti</i>	176

23. What is so Difficult about Learning Science through English? <i>Novriani Rabeka Manafre</i>	182
24. Analysis Cognitive Ability Enhancement through Cosmography Constructivism Facilitated Media Learning Management System <i>Permata Ika Hidayati, Soetjipto</i>	188
25. Micro-Hydro Power Plant Realia as Media to Enhance Students' Understanding on Power Plant <i>Radina Anggun Nurisma, Hendrik Elvian Gayuh Prasetya, Teguh Hady Ari Wibowo</i>	197
26. Self-Control and College Adjustment: Aspect and Measurement <i>Rahmah Hastuti</i>	204
27. The Motivation and Performance of Health as Consequence the Welfare Employees <i>Ratna Wardani</i>	213
28. Connection and Mathematical Disposition toward Advanced Mathematical Thinking in APOS Mathematics Learning <i>Retno Marsitin</i>	221
29. An International Group Membership on <i>Facebook</i> and Its Effect on Giving Feedback during Peer Review <i>Riza Weganofa; Henni Anggraeni; Rofi'ul Huda</i>	232
30. Community Service: Empowering the Deaf <i>Riza Weganofa, Siti Mafulah, Fitri Anggraini</i>	239
31. Critical Thinking about Education and Tax Policy in Indonesia: Study on Cases of Tax Evasion in European Countries <i>Rostamaji Kornawan</i>	243
32. Bilingual Concept of Cross-Linguistic Transfer: A Challenge for Contrastive Rhetoric <i>Rusfandi</i>	248
33. The Use of Videos to Improve Students' Ability in Listening to Narrative Texts <i>Widia Purnamasari; Sakti Nugroho</i>	255
34. The Use of Online Media to Enrich Student's Vocabulary <i>Siti Mafulah, Fitri Anggraini Hariyanto</i>	268

35. The Development of Learning Physics Device Based on KKNi to Increase Students' Mastery Concept and Critical Thinking <i>Sudi Dul Aji, Choirul Huda, Chandra Sundaygara, Muhammad Nur Hudha</i>	277
36. A Survey Study on the Independence and the Openness of the Will be Teacher <i>Sudiyono; Maris Kurniawati</i>	285
37. Arts-based Responses to Cultural and Religion Identity to Inform Initial Teacher Education <i>Sue Erica Smith; Ratna Suryaratri; Deasyanti Adil</i>	292
38. Economic Empowerment Community to Economic Institutions <i>Pesantren</i> <i>Supriyanto</i>	300
39. Critical Thinking of the Elementary School Students in Coffee Plantation Area Based on Math Science Exemplars Task through Performance Assessment <i>Suratno; Dian Kurniati</i>	307
40. The Implementation of the Scientific Approach of Curriculum 2013 in English Classes at Sekolah Menengah Atas Negeri 6 Malang <i>Surya Fajar Cahyo Nuraeni</i>	313
41. Urgency of Education Based Socioecopreneurship in Indonesia (Analysis on Elementary Education) <i>Susan N H Jacobus</i>	324
42. Knowledge Management Model in the Achievement of Effectiveness of the Organization of Private Higher Education in Malang <i>Tanto Gatot Sumarsono; Abdurrabi</i>	329
43. Self-Assessment of Speaking Proficiency: Students' Criteria and Attitude <i>Umi Tursini</i>	341
44. Managing Instruction: Leadership Practices for Instructional Improvement in Indonesian School Reform <i>Umiati Jawas</i>	350
45. The Use of Creative Writing Handbook in Developing Ideas and Creativity of English Education Department Students in Writing Class <i>Uun Muhaji; Irene Trisisca</i>	365
46. The Analysis of Banking Systemic Risk in Indonesia <i>Vinus Maulina, Riril Mardiana Firdaus</i>	372

47. The Analysis of Banking Systemic Risk and Financial Linkages in Indonesia <i>Vinus Maulina; Sri Wilujeng</i>	382
48. Analysis of the Influence of the World's Oil Prices, Inflation, Interest Rate, and Rupiah / US Dollar Exchange Rate on the Return of Mining Sector's Shares Registered in Indonesia Stock Exchange in 2010 – 2015 <i>Waseso Segoro, Andri Kartika</i>	390
49. Improvement of Motivation and Learning Outcomes through Assessment of Social Sciences Student Portofolio in State Junior High School 5 Malang <i>Yuli Ifana Sari, Siti Halimatus Sakdiah, Hermina Mulyati Sudir</i>	398
50. Couched Peer Feedback: Teacher’s Intervention in Collaborative Peer Feedback Writing Activities <i>Annisa Astrid</i>	404
51. The Implementation of Fanpage in Creating Positioning Product for UMKM in Jakarta And Yogyakarta <i>Tjipto Djuhartono, Annisaa Utami, Wening Estiningsih</i>	416
52. The Implementation of Bureaucracy Reform: Role of Transformational Leadership, Organizational Culture and Employees Quality Competence as the Mediator <i>Christea Frisdiantara; Harinoto</i>	424
53. Knowledge Management and Transformational Leadership on Employees’ Performance Mediated by Organizational Culture <i>Harinoto</i>	437
54. Establishing Reading Comprehension on Report Text through the Presence and Absence of the Text Itself <i>Veranika</i>	448
55. Counseling Families through Parenting Positive Techniques in Dealing with Authoritarian Parenting <i>Wiwit Wahyutiningsih</i>	455
56. I _b W Kecamatan Kedopok Kota Probolinggo <i>Irma Tyasari, Enike Dwi Kusumawati, Suryaningsih, HB Sujiantoro</i>	461
57. Revitalising Anti Corruption Values in Economy Development as The Learning for Pre-service Teachers <i>Ninik Indawati</i>	466

58. Innovation And Business Strategies To Enhance Firm Performance: Study of SMEs Cluster In Malang <i>Rita Indah Mustikowati, Iva Nurdiana Farida</i>	472
59. The Development of Policy Evaluation Model of Bank Indonesia(BI) and Otoritas Jasa Keuangan (OJK) for Mandatory Audit of BPRS <i>Koenta Adji Koerniawan, Irma Tyasari</i>	481
60. Community as the Actor in Empowerment: The Role of Community Information Group of Surabaya in Building Well-informed Community <i>Nurul Ratna Sari</i>	487
61. The Air Flow as Function of Temperature in Rectangular Heated Chamber in Solar Thermal Cyclone Wind Turbine Generator <i>Sugiono, A. Raharjo, Sujatmiko</i>	499
62. Development of Android-Based Blended Learning Accompanied with Video Tutorials To Improve Students' Understanding And Skill Of Computer Programming Course <i>Choirul Huda, Nurul Ain</i>	504
63. Evaluation of Placement Policy: Correlation between Placement Test Score and Students' Achievement in Integrated Course <i>Ayu Liskinasih, Rizky Lutviana</i>	513
64. Application of Multiculturalism Based Approach to Improve Students' Understanding in Literary Critism (Case Studies in English Literature Department of Kanjuruhan University, Malang) <i>Sujito</i>	519
65. Financial Performance Evaluation Department of Industry, Trade, and District in Indonesian Market Developments in Optimized SMEs <i>Ida Nuryana</i>	527

Self-Assessment of Speaking Proficiency: Students' Criteria and Attitude

Umi Tursini

tursini_umi@yahoo.com

University of Kanjuruhan Malang

Abstract: An assessment that involves reflecting on and monitoring performance is essential to provide students with more opportunities for learning. Through self-assessment and focus group discussion, the participants in this study are able to take control of their learning and generate feedback used for improvement. This study specifically explored students' criteria in self-assessing their speaking proficiency and the students' attitude regarding the effectiveness of self-assessment. Qualitative study, which drew on multiple data sources including audio-recorded interviews, focus group discussion notes, recording of students' speaking performance, was employed. Self-assessment and focus group discussion with other participants and the teacher functioned as tools for providing feedback to students' speaking performance. Ten English students of University of Kanjuruhan Malang volunteered to engage in self-assessment activities. The findings of this study suggested that students focused on various aspects of speaking skill in self-assessing their performance and that self-assessment had significant potential to help students to improve their speaking skill in terms of identifying their strengths and weaknesses and proposing some plans or strategies to address the weaknesses.

Keywords: *Self-Assessment, Speaking Proficiency, Criteria, Attitude, Qualitative*

INTRODUCTION

Students will have more opportunities to promote their learning and achieve better if they obtain sufficient feedback on their learning performance. Unfortunately, in most Indonesian education system, students are assessed summatively to *get students' final grade* at the end of an instructional unit. The students get little formative feedback on their learning (Black & Wiliam, 1998). This due, in large part, to the facts that there are too many students in one class, most of Indonesian teachers have tight and busy schedule, and the duration of teaching learning process in the class is limited. Therefore, rather than relying on teacher as the sole source of learning evaluation, it is necessary for Indonesian students to have their own initiative to evaluate their learning via self-assessment. Fortunately, relevant studies also show that students themselves can be meaningful sources of feedback in self-assessment (Andrade & Boulay, 2003; Andrade, Du, & Wang, 2008).

Self-assessment, as a formative assessment tool, may be considered as a process of reflection on the quality of learning with the purpose of identifying the strengths and weaknesses and target areas that need work. The students, therefore, play the main role in assessment process. When students are involved in the assessment process, they can make

improvement in both their ability to make judgments about their understanding and their ability to make decisions on how to improve their learning (Black & Wiliam, 1998; Heritage, 2009; Tan, 2008). Moreover, self-assessment assists students to set desired goals and thus to learn for themselves.

Relevant studies have recommended the use of self-assessment and associated it with learning and achievement (Brown & Harris, 2013; Andrade, 2010; Leahy, Lyon, Thompson, & Wiliam, 2005). The main focus of the present study was engaging ten English students to set their own criteria in self-assessing their speaking proficiency and respond the effectiveness of self-assessment. The students were required to assess their speaking without providing scoring criteria. However, “the assessment of speaking, as an extremely difficult skill to test, involves a number of procedures to capture all the defining characteristics for objective testing” (Babaii, Taghaddomi, & Pashmforoosh, 2015, p. 3). Therefore, students still need feedback from others to make sure the accuracy of their assessment and to get more ideas how to improve their learning, such as teachers or fellow learners. This is because “feedback becomes a central component to the learning process in that a dialogue exists between teacher and student that facilitates and fosters knowledge acquisition” (Meer, 2012). Therefore, besides self-assessing their own speaking proficiency, the participants in this study were facilitated to have peer-assessment and engage in focus group discussion with their friends and teacher.

LITERATURE REVIEW

The term ‘self-assessment’ subsumes terms of ‘self-evaluation’. It has been defined as the act of evaluating oneself and making decisions about the next step by asking a series of questions – ‘How am I doing? Is this enough? Is this right? How can I tell? Should I go further?’ (Boud, 1995). By answering these questions, students are learning to self-regulate and gradually taking over the ownership of their learning through self-assessment. Andrade, Du, and Mycek (2010) identified self-assessment as “a process of formative assessment during which students reflect on the quality of their work, judge the degree to which it reflects explicitly stated goals or criteria, and revise accordingly” (p. 199). In addition, according to McMillan (2008, p.39), self-assessment occurs when “students judge their own work to improve performance as they identify discrepancies between current and desired performance. Self-assessment also identifies further learning targets and instructional strategies (correctives) students can apply to improve achievement”. Thus, the focus of self-assessment activity is to close the gap between current and desired performance by improving students’ learning. It is a process-oriented rather than outcome-oriented.

There are some tools that can be utilized for students to self-assess such as checklists, rubrics, audio/video recording, portfolios, journals, or surveys. Each tool has its own advantages and disadvantages. For example, checklists are easy to construct and use but provide limited information about how to improve performance, rubrics help the grading process become more efficient, but the development of rubrics can be complex and time-consuming. Therefore, teachers may help the students to adapt the tools to suit their needs. In this study, the students were encouraged to use audio recording as the self-assessment tool.

The Purposes of Self-Assessment

The purposes of doing self-assessment for the students are to are to boost learning and achievement, and to promote academic self-regulation, or the tendency to monitor and manage their own learning (Pintrich, 2000; Zimmerman & Schunk, 2004). Woodward and Munns (2007) found that there is significant relationship between increased levels of student engagement and student self-assessment. The study conducted by Orsmond and Merry (2013)

found that higher achievers gained more from tutor feedback than did their peers because of their better self-assessment ability. Rivers (2001) studied mature and successful foreign language learners, and discovered that these learners regularly engaged in self-assessment. In addition, Oscarson (1997) mentioned that self-assessment helps students to be more confidence while performing a task. In other words, self-assessment gives positive contribution to the improvement of students learning which leads to self-regulation and achievement improvement.

According to Goodrich (1996), in order for effective self-assessment to occur, students need:

- awareness of the value of self-assessment,
- access to clear criteria on which to base the assessment
- a specific task or performance to assess,
- models of self-assessment,
- direct instruction in and assistance with self-assessment,
- practice,
- cues regarding when it is appropriate to self-assess, and
- opportunities to revise and improve the task or performance.

Thus, the above components, which constitute to students' motivation, opportunity, and support to do self-assessment, are needed aiming for students' improvement in learning. This study reports the result of a study undertaken with ten students self-assessing speaking performance. The following questions constituted the focus of the study: (1) What criteria do students use to rate their own speaking proficiency? (2) How does self-assessment assist students to improve their speaking proficiency?

METHODOLOGY

As stated above, the purpose of the present study is to explore students' criteria in self-assessing their speaking proficiency and the students' attitude regarding the effectiveness of self-assessment. In order to achieve this purpose, the qualitative study was employed. A self-assessment procedure was presented to ten English students of University of Kanjuruhan Malang in their speaking lesson. The ten students were chosen purposively as the research participants based on the considerations of their difference in gender (male and female) and English mastery (intermediate and advanced level).

The instruments used in this study included voice recorder, focus group discussion, and interviews. The voice recorder was used to record participants' speaking performance with their permission for three times. The voice recorder was placed on every participant's desk. Focus group discussion were conducted every time the participants finished self-assessing their speaking. In other words, the focus group discussions were conducted three times. In the study, a semi-structured interview was employed and carried out in Indonesian. The interviewer was the author herself. To avoid the influence on one another, the interview was conducted individually in a classroom and audiotaped. With the help of interview guidance, the author invited students to express their feelings of doing self-assessment and what they have learned in the process. Some elaboration in the questions and answers was also allowed.

Research procedure in this study is presented in Chart 1 below.

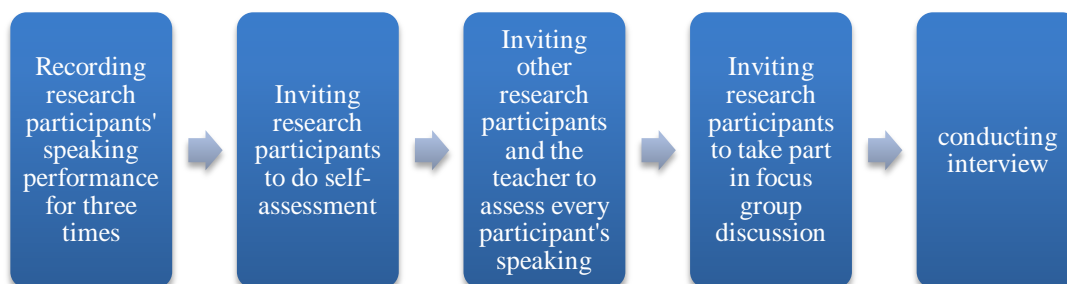

Chart 1: The procedures of data collection

Based on the above diagram, firstly, the students' speaking was recorded three times when they did individual presentation in front of the class. The students were then invited to listen the recordings and self-assess their speaking performance. The students were encouraged to set their own criteria in the process in self-assessment and were not provided with scoring rubric. Other research participants and the teacher were also invited to assess every participant's speaking performance. The purpose was to get more feedback and cross check the accuracy of every participant's judgment. When the students had completed their self-assessment process, they were invited to take part in focus group discussion with other research participants and their teacher. The purpose of conducting focus group discussion was to encourage students to share their rate in self-assessing their speaking performance and to know others' opinion about that including the possible ways to improve their learning. Finally, the participants were invited to take part in interview.

FINDINGS

Students' self-mentioned criteria for rating speaking

The first research question was aimed at exploring the students' criteria to rate their own speaking proficiency. To answer this question, the data from interview, voice recording, and focus group discussion were analyzed inductively. The students' comments were compiled and categorized to arrive at the students' assessment criteria for English speaking. The six criteria used by the students in assessing their speaking performance are presented below with follow-up, relevant excerpts taken from the students' comments on their strengths and weaknesses of their speaking. The criteria include pronunciation, grammar, diction, fluency, vocabulary, and time management.

1. Pronunciation

All participants focused on their pronunciation in assessing their speaking performance. Two research participants, for example, stated:

What I first noticed when I listened to my speech was my pronunciation. When I listened, I was very much surprised by myself. I found some mistakes in pronouncing words such as define, honest, genre, love, and children.

My pronunciation was not accurate. I really need to improve my pronunciation. I mispronounced the words heart, hurt, , based, strange, now, define, criteria, school, etc.

2. Grammar

All research participants also paid attention on their use of grammar in self-assessing their speaking proficiency. The examples of the students' excerpts are presented below.

I just realized I made some grammar mistakes and my friends said so. I need to give more attention on the use of appropriate grammar in my speech.

I could listen clearly that I made many grammar mistakes when I talked. I did not realize that when I was talking.

3. Diction

Diction refers to choice of words. Although some research participants did not mention directly that they had difficulties in their diction when they talked, they mentioned that they did not use the correct vocabulary as presented in the excerpts below.

*I should say **passed away** instead of **died** when I talked. I still got problem with my vocabulary.*

*I got difficulties in using the correct vocabulary in some expressions such as **bring** when I should use **carry**, **desire** when I want to say **willingness**.*

4. Fluency

Some participants considered fluency (able to talk accurately and quickly) as one of criteria in self-assessing their speaking. One participant mentioned that he was good in his fluency, but another participant found difficulty in her fluency as stated in the below excerpts.

One of the strengths in my speaking is my fluency, I think. The speed of my speaking is already good.

I was not happy with my fluency in my speech. I used a sound like e..e..e so many times.

5. Vocabulary

Research participants also considered vocabulary as one of the criteria when they self-assessed their speaking proficiency as stated in the excerpts below.

I think the words I used in my speech were various. I did not use the same words many times.

I still need to enlarge my vocabulary. I stopped suddenly when I talked since I forgot how the say the words in English. At that time, my lecturer helped me.

6. Time management

The last criterion considered by two research participants was time management. The participants, for example, commented that

I think I did not have problem in time management. When my lecturer gave me two minutes to talk, I could use the time efficiently.

I think my biggest problem is in time management. I could not focus on the topic I talk. I talk about many topics in one occasion so I ran out of time.

The benefits of self-assessment

All research participants mentioned that they never did self-assessment before. By participating in this research, they got first experience in conducting self-assessment. The second question in this study focused on how self-assessment assisted students to improve their speaking proficiency. To address this question, inductive analysis was employed. The students' comments were compiled and categorized to arrive at the benefits of self-assessment activity

for students learning.

1. Facilitating the development of reflection in learning

The research participants mentioned that self-assessment encouraged them to change the way they learn. They wanted to minimize their weaknesses in their speaking they found in self-assessment activity. One participant stated that:

I want to improve my speaking especially my pronunciation. I'll check my audio dictionary if I'm not sure how to pronounce certain word correctly. I will also try to pay more attention on some mispronounced words I found in self-assessment activity. Next time, I should be more careful when I talk in English. I need to reduce my speed and talk slowly so that my English will be more understandable. I'll try to keep that in mind.

The above statement show that self-assessment helps the students to do reflection on their learning. They learn from mistakes and difficulties and want to use them to improve their learning.

2. Helping clarify what good performance is

By assessing other participants' speaking performance, as a part of self-assessment in this study, the research participants gained more understanding on what good speaking was as stated by the participants in the excerpt below.

When I listened to my friends' speech, I was amazed on how good it was. He could talk fluently with good pronunciation and grammar. I want to be like him. I need to talk like my friend, I think. He did not have any problems with his pronunciation and grammar when he talked. His good speaking ability motivates me to do better.

In other words, the students compared their ability with their friends. They then clarified what good speaking was. In addition, they get meaningful feedback from each other in focus group discussion activity.

3. Delivering good understanding to students about their learning

The research participants also mentioned that self-assessment helped them to be more aware of their strengths and weaknesses in their speaking as stated in the following excerpts.

This is my first experience to do self-assessment. After listening to my own voice recording, I could analyze what good aspects and what needs to improve from my speaking. I was already good at my fluency but still need a lot of improvement in my pronunciation and vocabulary. I did not have problem in time management when I talked. However, my grammar was bad. I did not realize before that I got difficulty in the use of grammar in my speech.

The above statements imply that self-assessment facilitates the students to get more information and understanding about their learning.

4. Encouraging positive motivational beliefs and self-esteem

Self-assessment also encouraged the students to have positive motivational beliefs and self-esteem. This was because of the good points they found in their speaking when they did self-assessment activity.

My fluency and pronunciation are not bad. I'm sure I will do better in the next speaking activity.

Although I found some weaknesses in my speaking especially in grammar and vocabulary, I believe that I can improve my speaking if I keep practicing.

DISCUSSION

This study explored students' criteria in self-assessing their speaking proficiency and the students' attitude regarding the effectiveness of self-assessment. To investigate the research questions in this study, qualitative design was used. The findings indicated that the students' self-mentioned criteria included pronunciation, grammar, diction, fluency, vocabulary, and time management. The results of the present study confirm the findings of Babaii, et al (2016) that investigated the extent to which learners' assessment of their own speaking performance, before and after their being provided with a list of agreed-upon scoring criteria followed by a practice session, matches that of their teachers. One of the research findings showed that the learners' criteria to rate their own speaking before being provided with the teachers' agreed-upon criteria and the follow-up practice session include seven criteria. Those are topic management, confidence, fluency, time management, grammar, vocabulary, and pronunciation.

Most of studies about self-assessment deal with the accuracy of students' self assessment (Dunning, Heath, & Suls, 2004; brown & Haris, 2013). However, Cowan (1988) has argued that the self-assessment are so beneficial that we should trust students to act appropriately even when there is a risk that there could be differences between the student mark and the teacher mark. In other words, students should be encouraged and supported to do self-assessment to improve the effectiveness of their learning. Although, it might be difficult for students to do self-assessment, the students will naturally be able to rate their ability. By having active involvement in self-assessing their learning, the students' ability to self-assess will improve. The students also can validate their rating to their peers or teachers.

The findings also indicated that the introduction of self-assessment practice was well accepted by students. Students' attitudes toward self-assessment were positive. The students' attitudes and responses regarding the effectiveness of self-assessment include facilitating the development of reflection in learning, helping clarify what good performance is, delivering good understanding to students about their learning, and encouraging positive motivational beliefs and self-esteem. This confirms the findings of de Saint Leger (2009) who stated that self-perception evolved positively over time in relation to fluency, vocabulary, and self-confidence in speaking in second language as a result of self-assessment. In addition, Boud (2000) suggested that sustainable self-assessment as a self-learning activity, results in improved short- and long-term learning.

In this study, self-assessment was done formatively to “help students recognize their strengths and weaknesses and hence improve specific aspects of their performance” (Baleghizadeh, S. & Masoun, A., 2013, p. 53). This means that students learning and achievement can be improved by implementing self-assessment. The results of the study, therefore, lead to more optimistic view about the potential for the adoption of self-assessment practices in schools. The full supports from the school management and teachers are necessary. The school needs to give more opportunities to students to do self-assessment of their learning. Teachers, then, could teach the students to define and apply certain criteria, by which they assess their learning. Teachers should also give students feedback on students' self-assessment and provide sufficient time for revision and improvement after self-assessment.

CONCLUSION

This study provides both theoretical and practical implications. Theoretically, this study adds more literature in self-assessment especially in the Indonesian context. At the

practical level, the students are provided with the opportunity to take part in self-assessment activity they have never done before. This evidently has significant potential to help students to improve their speaking skill in terms of identifying their strengths and weaknesses and proposing some plans or strategies to address the weaknesses. A further implication is for policy makers and teachers. They should provide opportunities and support for students to conduct self-assessment. Providing students with guidance and support and opening a dialogue to allow further interpretation of feedback becomes a mandate in ensuring students fully engage with and make use of feedback designed to promote self-assessment practices (Wiliam, et al, 2010).

However, data of this study were mainly gathered from ten English students. The future research may, then, be conducted with larger and more representative groups of participants in diverse contexts. Further research on other areas of language proficiency and different self-assessment tool are also needed to validate the claim that requiring learners to do self-assessment is an effective way to contribute to the learning improvement and student achievement.
